

MICHAEL DYE

FULLSTACK ENGINEER

CALL ME
615-423-2458

PROFILE

I use modern web technologies to build excellent user interfaces. While I specialize in the frontend, I also have strong knowledge of the backend, having built apps using Node.js, Express and MongoDB.

I enjoy learning new technologies and am continuously focused on adding new libraries, frameworks, languages, and design patterns to my toolbox. I also have plenty of experience building marketing sites for clients on popular CMSs, such as WordPress and Drupal.
